

**IN THE UNITED STATES DISTRICT COURT FOR THE
CENTRAL DISTRICT OF ILLINOIS
ROCK ISLAND DIVISION**

H.K. and J.C., through their father and legal guardian CLINTON FARWELL, individually and on behalf of all others similarly situated,

Plaintiffs,

v.

Google, LLC,

Defendant.

No.

Notice of Removal

Pursuant to 28 U.S.C. §§ 1332, 1441, 1446, and 1453, defendant Google LLC (“Google”) hereby gives notice of removal of this action from the Circuit Court of McDonough County, Illinois to the United States District Court for the Central District of Illinois, Rock Island Division.

By filing this notice, Google does not concede any allegation, assertion, claim, or demand for relief in the Complaint of Plaintiffs H.K. and J.C., through their father and legal guardian Clinton Farwell, or that any damages exist. Google expressly denies that it has violated the Illinois Biometric Information Privacy Act, 740 ILCS 14/1, *et seq.* (“BIPA”), affirmatively states that it intends to defend this matter vigorously, and reserves all defenses and objections to the allegations, assertions, claims, demands for relief, and supposed damages set forth in the Complaint.

I. The State Court Action

On November 19, 2020, Plaintiffs, on behalf of themselves and allegedly similarly situated individuals, commenced this action in the Circuit Court for McDonough County, Illinois

under the caption *H.K. and J.C., through their father and legal guardian CLINTON FARWELL, individually and on behalf of all others similarly situated v. Google LLC*, Case No. 20-LL-00017. *See* Ex. A (Complaint). Plaintiffs provided a waiver of service on March 10, 2021, which counsel for Google returned on March 22, 2021. *See* Ex. B. No substantive action has been taken in the Circuit Court.

Plaintiffs seek relief based on Google’s alleged violations of BIPA. Specifically, they allege that Google collected Plaintiffs’ biometric data¹ and other personal information through its educational product Google Workspace for Education (“GWFE”) (formerly called G Suite for Education) without providing and complying with public notice of a retention schedule and destruction guidelines for biometric data, and providing their parents with direct notice of its collection practices and obtaining their parents’ consent for the collection prior to collection.² Ex A. ¶¶ 23, 34-43. Plaintiffs allege that Google recorded their voices and “imaged their faces” when unspecified features of GWFE “required” them to use their laptop’s microphone and camera. *Id.* ¶ 35. Then, Google allegedly “extracted, collected, stored, and cataloged each of their ‘voiceprints’” and “their ‘scans of face geometry,’” both of which are alleged “biometric identifier[s].” *Id.* ¶ 36. Plaintiffs further allege that Google linked the collected data to “voiceprints or face templates previously collected from the Plaintiff that are stored in its database and linked to the Plaintiffs’ identity.” *Id.* ¶ 37.

Plaintiffs bring this action as a class action, seeking to represent an alleged class of “[a]ll persons who, while using the ‘G Suite for Education’ platform at a primary or secondary school

¹ Google uses “biometric data” to refer to both biometric identifiers and biometric information as defined under the statute. 740 ILCS 14/10.

² GWFE is a suite of learning, collaboration, and communication tools for schools. GWFE is referred to in the complaint by its former name, G Suite for Education.

in Illinois, had their voiceprint or face template collected by Google after March 26, 2015.” *Id.* ¶ 44.

On behalf of themselves and each putative class member, Plaintiffs seek: “\$1,000.00 statutory damages . . . pursuant to 740 ILCS 14/20(1) for each violation of BIPA committed by Google negligently, or \$5,000.00 pursuant to 740 ILCS 14/20(2) for each violation of BIPA committed by Google intentionally or recklessly,” “injunctive and other equitable relief pursuant to BIPA” including, among other injunctive relief, an order “to permanently destroy the biometric identifiers and biometric information it has collected” to date, “reasonable litigation expenses and attorneys’ fees,” “pre- and post-judgment interest,” and “other and further relief as equity and justice may require.” Ex. A at 23-24 (Prayer for Relief).

II. Grounds for Removal

A. This Action is Removable Under the Class Action Fairness Act of 2005

“[A]ny civil action brought in a State court of which the district courts of the United States have original jurisdiction, may be removed by the defendant” 28 U.S.C. § 1441(a). This action is removable under § 1441 because this Court has original jurisdiction under the Class Action Fairness Act of 2005 (“CAFA”). *See* 28 U.S.C. § 1332(d); *see also* 28 U.S.C. § 1453(b) (procedure for removing class actions).

Under CAFA, federal district courts have original jurisdiction over any putative class action in which (1) the aggregate number of members in the proposed class is 100 or more; (2) the matter in controversy “exceeds the sum or value of \$5,000,000, exclusive of interest and costs”; and (3) the parties are minimally diverse—that is, “any member of a class of plaintiffs is a citizen of a State different from any defendant.” 28 U.S.C. § 1332(d)(2), (d)(2)(C); *see also Roppo v. Travelers Com. Ins. Co.*, 869 F.3d 568, 578 (7th Cir. 2017) (requirements for CAFA

jurisdiction). Because all those requirements are met here, and because Google has met all other applicable requirements, this action is removable under CAFA.

This is a putative class action under CAFA, which defines “class action” as “any civil action filed under rule 23 of the Federal Rules of Civil Procedure or similar State statute or rule of judicial procedure authorizing an action to be brought by 1 or more representative persons as a class action.” 28 U.S.C. § 1332(d)(1)(B). Plaintiffs bring this class action under 735 ILCS 5/2-801, *see* Ex. A ¶ 44, which allows “for the maintenance of a class action” when the alleged “class is so numerous that joinder of all members is impracticable”; “[t]here are questions of fact or law common to the class, which common questions predominate over any questions affecting only individual members”; “[t]he representative parties will fairly and adequately protect the interest of the class”; and “[t]he class action is an appropriate method for the fair and efficient adjudication of the controversy.” 735 ILCS 5/2-801(1)-(4). The requirements for class certification under Section 2-801 parallel those of Federal Rule of Civil Procedure 23. *Compare* 735 ILCS 5/2-801 *with* Fed. R. Civ. P. 23.

1. This is a putative class action in which the aggregate number of proposed class members is alleged to be more than 100.

Plaintiffs propose to represent a class of similarly situated students in primary and secondary school, who, like them, allegedly had their biometric data collected by Google when they used GWFE. Specifically, they seek to represent a class defined as “[a]ll persons who, while using the ‘G Suite for Education’ platform at a primary or secondary school in Illinois, had their voiceprint or face template collected by Google after March 26, 2015.” Ex. A ¶ 44. Plaintiffs believe that the number of individuals in the class is “at least tens of thousands of children.” *Id.* ¶ 45. Accordingly, while Google does not concede that Plaintiffs’ proposed class is certifiable, lawful, or otherwise proper, and while Google expressly reserves the right to raise

Notice of Removal

all arguments and defenses to their allegations, including their class certification allegations, the alleged class, as defined by the allegations of the Complaint, includes well over 100 people.

CAFA's first requirement is therefore satisfied.

2. The amount in controversy exceeds \$5,000,000.

CAFA requires courts to aggregate the claims of putative class members "to determine whether the matter in controversy exceeds the sum or value of \$5,000,000, exclusive of interest and costs." 28 U.S.C. § 1332(d)(6). A court must "determine whether it has jurisdiction by adding up the value of the claim of each person who falls within the . . . proposed class and determine whether the resulting sum exceeds \$5 million." *Standard Fire Ins. Co. v. Knowles*, 568 U.S. 588, 592 (2013). The amount in controversy "concerns what the plaintiff is claiming . . . not whether plaintiff is likely to win or be awarded everything he seeks." *Brill v. Countrywide Home Loans, Inc.*, 427 F.3d 446, 449 (7th Cir. 2005).

Plaintiffs do not allege a specific amount in controversy, so Google need only make "a plausible allegation that the amount in controversy exceeds the jurisdictional threshold." *Dart Cherokee Basin Operating Co. v. Owens*, 574 U.S. 81, 89 (2014). Here, based on Plaintiffs' allegations in the Complaint, the amount in controversy exceeds the \$5,000,000 threshold for removal under CAFA. BIPA provides for \$1,000 in statutory damages for each negligent violation, 740 ILCS 14/20(1), and \$5,000 in statutory damages for each intentional or reckless violation, *id.* 14/20(2). Plaintiffs seek at least \$1,000 for themselves and each class member, of which there are "at least tens of thousands." Ex. A ¶¶ 45, 59. Thus, as alleged in the Complaint, the minimum amount in controversy easily surpasses CAFA's threshold. CAFA's second requirement is therefore satisfied. *See Appert v. Morgan Stanley Dean Witter, Inc.*, 673 F.3d 609, 617-18 (7th Cir. 2012) ("Morgan Stanley has provided a good-faith estimate that plausibly

explains how the stakes exceed \$5 million. That is sufficient.”); *Blomberg v. Serv. Corp. Int’l.*, 639 F.3d 761, 764 (7th Cir. 2011) (“Once the proponent of federal jurisdiction has explained plausibly how the stakes exceed \$5,000,000 . . . the case belongs in federal court unless it is legally impossible for the plaintiff to recover that much.”).

3. The parties are minimally diverse.

Plaintiffs allege that they, and their father, are citizens and residents of the state of Illinois. Ex. A ¶ 9. They further allege that Google is incorporated in Delaware and headquartered in California. *Id.* ¶ 10. According to the Complaint, Google is therefore a citizen of those states. *See* 28 U.S.C. § 1332(c)(1). Thus, “any member of [the class] of plaintiffs is a citizen of a State different from any defendant,” 28 U.S.C. § 1332(d)(2)(A), and CAFA’s third and final requirement is satisfied.

4. None of CAFA’s exceptions bar removal.

This action does not fall within the exceptions to removal jurisdiction under CAFA. Section 1332(d)(4) requires a federal court to decline jurisdiction over a class action when, among other things, “greater than two-thirds of the members of all proposed plaintiff classes in the aggregate are citizens of the State in which the action was originally filed,” and at least one defendant whose “alleged conduct forms a significant basis for the claims asserted by the proposed class . . . is a citizen of the State in which the action was originally filed.” 28 U.S.C. § 1332(d)(4)(A); *see also* 28 U.S.C. § 1332(d)(4)(B) (similarly excluding cases where “two thirds or more of” the class members and “the primary defendants . . . are citizens of the State in which the action was originally filed”). Section 1332(d)(4) does not apply here because Google is not a citizen of Illinois, where the action was originally filed. Likewise, the discretionary exemptions in Section 1332(d)(3) apply only where “the primary defendants are citizens of the State in

which the action was originally filed.” 28 U.S.C. § 1332(d)(3); *see also Roppo*, 869 F.3d at 585 (local controversy and discretionary CAFA exceptions do not apply when primary defendant is not citizen of state in which action was filed).

Sections 1332(d)(9) and 1453(d) exempt certain securities and corporate-governance cases from CAFA’s broad jurisdictional grant. See 28 U.S.C. §§ 1332(d)(9), 1453(d). They are inapplicable here because Plaintiffs’ claims do not arise under the Securities Act of 1933 or the Securities Exchange Act of 1934 and do not involve state-centric corporate governance issues.

5. Venue and Intra-District Assignment Are Proper

The Central District of Illinois, Rock Island Division is the proper venue and intra-district assignment for this action upon removal because this “district and division embrac[e]” the Circuit Court of McDonough County, Illinois, where the Complaint was filed. *See* 28 U.S.C. § 1441(a); CDIL-LR 40.1(C).

B. Google Has Satisfied All Other Requirements

Google timely filed this Notice of Removal. Google waived service on March 22, 2021. *See* Ex. B. Google subsequently filed and served this Notice of Removal within 30 days of said service, as required by 28 U.S.C. § 1446(b).

Further, as required by 28 U.S.C. § 1446(a), Google has filed with this Notice of Removal true and correct copies of all process, pleadings, and orders served upon Google in the state-court action. *See* Exs. A, B. A true and correct copy of the state court docket is attached as Exhibit C.

Finally, Google will promptly serve on Plaintiffs and file with the Circuit Court a “Notice of Removal to Federal Court.” Google will also file with this Court a “Certificate of Service of

Notice to Adverse Party of Removal to Federal Court.” 28 U.S.C. § 1446(d); *see also* Fed. R. Civ. P. 5(d).

III. Reservation of Rights and Defenses

Google expressly reserves all of its defenses and rights, and none of the foregoing shall be construed as in any way conceding the truth of any of Plaintiffs’ allegations or waiving any of Google’s defenses. Google also reserves its right to amend or supplement this Notice of Removal.

IV. Conclusion

For the foregoing reasons, Google respectfully requests that this Court exercise jurisdiction over this action and enter orders and grant relief as may be necessary to secure removal and to prevent further proceedings in this matter in the Circuit Court of McDonough County, Illinois. Google further requests whatever other relief the Court deems appropriate.

Respectfully submitted,

Exhibit A

**CIRCUIT COURT FOR THE 9TH JUDICIAL DISTRICT
COUNTY OF MCDONOUGH, STATE OF ILLINOIS**

H.K. and J.C., through their father and legal guardian CLINTON FARWELL, individually and on behalf of all others similarly situated,

Plaintiffs,

v.

GOOGLE, LLC,

Defendant.

Case No.: 20LL00017

JURY TRIAL DEMANDED

CLASS ACTION COMPLAINT

On behalf of themselves and all others similarly situated, Plaintiffs H.K. and J.C., minor children, by and through their father and legal guardian Clinton Farwell (collectively, “Plaintiffs”), bring this Class Action Complaint against Google LLC (“Google”) for violation of Illinois’ Biometric Information Privacy Act (“BIPA”), 740 ILCS 14/1, *et seq.*, and allege as follows based on personal knowledge as to themselves, on the investigation of their counsel and the advice and consultation of certain third-party agents as to technical matters, and on information and belief as to other matters, and demand trial by jury.

NATURE OF ACTION

1. Plaintiffs bring this action for damages and other legal and equitable remedies resulting from the illegal actions of Google in collecting, storing, and using their and other

similarly situated children’s biometric identifiers¹ and biometric information² (referred to collectively as “biometrics”) in direct violation of BIPA.

2. In 2008, the Illinois Legislature recognized the importance of protecting the privacy of individuals’ biometric data, finding that “[b]iometrics are unlike other unique identifiers that are used to access finances or other sensitive information.” 740 ILCS 14/5(c). “For example, social security numbers, when compromised, can be changed. Biometrics, however, are biologically unique to the individual; therefore, once compromised, the individual has no recourse, is at heightened risk for identity theft, and is likely to withdraw from biometric-facilitated transactions.” *Id.*

3. In recognition of these concerns over the security of individuals’ biometrics, the Illinois Legislature enacted BIPA, which provides, *inter alia*, that a private entity like Google may not obtain and/or possess an individual’s biometrics unless it: (1) informs that person in writing that biometric identifiers or information will be collected or stored, *see id.*; (2) informs that person in writing of the specific purpose and length of term for which such biometric identifiers or biometric information is being collected, stored, and used, *see id.*; (3) receives a written release from the person for the collection of her biometric identifiers or information, *see id.*; and (4) publishes publicly available written retention schedules and guidelines for permanently destroying biometric identifiers and biometric information, 740 ILCS 14/15(a).

4. Google has systematically violated this important consumer protection statute by collecting, storing, and using the biometric data of millions of school children throughout the

¹ A “biometric identifier” is any personal feature that is unique to an individual, including fingerprints, iris scans, DNA and “face geometry,” among others.

² “Biometric information” is any information captured, converted, stored, or shared based on a person’s biometric identifier used to identify an individual.

country (including in Illinois) without seeking, much less obtaining the requisite informed written consent from any of their parents or other legal guardians.

5. Google has infiltrated the primary and secondary school system in this country by providing access to its “ChromeBook” laptops, which come pre-installed with its “G Suite for Education” platform (formerly referred to as Google Apps for Education), to over half of the nation’s school children, including those in Illinois. When these children use Google’s “G Suite for Education” platform on the company’s ChromeBook laptops at school, Google creates, collects, stores and uses their “face templates” (or “scans of face geometry”) and “voiceprints” – highly sensitive and immutable biometric data – as well as various other forms of personally identifying information pertaining to these children, including:

- a. their physical locations;
- b. the websites they visit;
- c. every search term they use in Google’s search engine (and the results they click on);
- d. the videos they watch on YouTube;
- e. personal contact lists;
- f. voice recordings;
- g. saved passwords; and
- h. other behavioral information

6. Each voiceprint and face template that Google extracts from a child and catalogues in its vast biometrics database is unique to that child, in the same way that a fingerprint uniquely identifies one and only one person. Google supplements this biometric data with other personally identifying information pertaining to each child, including the child’s e-mail address and name.

7. Thus, in direct violation of BIPA, Google has collected, stored, and used (and continues to collect, store, and use) – without obtaining the requisite signed written release or publishing the mandated data retention policies – the biometrics of millions of school children across the country, including tens of thousands of young children in Illinois.

8. Plaintiffs, individually and on behalf of other similarly situated children, by and through their father and legal guardian Clinton Farwell, bring this action to stop Google from further violating the BIPA-protected privacy rights of children in Illinois in connection with their use of the “G Suite for Education” platform, and to recover statutory damages for Google’s unauthorized collection, storage, and use of Illinois students’ biometric data in violation of BIPA.

PARTIES

9. Plaintiffs H.K. and J.C., and their father and natural legal guardian, Clinton Farwell are, and at all relevant times have been, citizens of the State of Illinois residing in Bushnell, Illinois, which is within McDonough County. Plaintiffs H.K. and J.C. have used Google’s “G Suite for Education” platform at their elementary school in Bushnell, Illinois, which is within Prairie City Community Unit School District #170. Neither Plaintiff H.K. nor Plaintiff J.C. was asked for their consent to authorize Google extraction, collection, storage, and use of their uniquely identifying “biometric identifiers” or “biometric information,” nor was Plaintiffs’ father, Clinton Farwell, notified of or asked to provide his written authorization to permit Google’s collection, storage, or use of such data.

10. Google, LLC is a Delaware corporation with its headquarters at 1600 Amphitheatre Parkway, Mountain View, California 94043. Google is also registered to do business in Illinois (No. 65161605).

JURISDICTION AND VENUE

11. Personal jurisdiction exists over Defendant in Illinois and venue is proper in this Court because Plaintiffs reside in McDonough County, Illinois; because Plaintiffs had their biometrics collected by Defendant while they were using Google Chromebook laptops that Defendant had supplied and shipped to their school in McDonough County, Illinois; because Google failed to but should have (as required by BIPA) obtained statutorily compliant written releases authorizing the collection of Plaintiffs' biometrics from within McDonough County, Illinois; and because Plaintiffs' biometrics were used by Defendant while Plaintiffs were physically present in McDonough County, Illinois, such that the Plaintiffs' privacy was violated in McDonough County, Illinois and Defendant violated BIPA (as alleged herein) in Illinois and in substantial part within McDonough County, Illinois.

FACTUAL BACKGROUND

I. Biometric Technology Implicates Consumer Privacy Concerns

12. "Biometrics" refers to unique physical characteristics used to identify an individual. One of the most prevalent uses of biometrics is in facial recognition technology, which works by scanning a human face or an image thereof, extracting facial feature data based on specific "biometric identifiers" (*i.e.*, details about the face's geometry as determined by facial points and contours), and comparing the resulting "face template" (or "faceprint") against the face templates stored in a "face template database." If a database match is found, an individual can be identified.

13. The use of facial recognition technology in the commercial context presents numerous consumer privacy concerns. During a 2012 hearing before the United States Senate Subcommittee on Privacy, Technology, and the Law, a member of the U.S. Senate stated that

“there is nothing inherently right or wrong with [facial recognition technology, but] if we do not stop and carefully consider the way we use [it], it may also be abused in ways that could threaten basic aspects of our privacy and civil liberties.”³ Senator Franken noted, for example, that facial recognition technology could be “abused to not only identify protesters at political events and rallies, but to target them for selective jailing and prosecution.”⁴

14. The Federal Trade Commission (“FTC”) has raised similar concerns, and recently released a “Best Practices” guide for companies using facial recognition technology.⁵ In the guide, the Commission underscores the importance of companies’ obtaining affirmative consent from consumers before extracting and collecting their biometric identifiers and biometric information from digital photographs.

II. The Illinois Biometric Information Privacy Act

15. In 2008, Illinois enacted the BIPA due to the “very serious need [for] protections for the citizens of Illinois when it [comes to their] biometric information.” Illinois House Transcript, 2008 Reg. Sess. No. 276. The BIPA makes it unlawful for a company to, *inter alia*,

Comm. on the Judiciary*, 112th Cong. 1 (2012), available at https://www.eff.org/files/filenode/jenniferlynch_eff-senate-testimony-face_recognition.pdf (last visited Feb. 18, 2020).

⁴ *Id.*

⁵ *Facing Facts: Best Practices for Common Uses of Facial Recognition Technologies*, Federal Trade Commission (Oct. 2012), available at <http://www.ftc.gov/sites/default/files/documents/reports/facing-facts-best-practices-common-uses-facial-recognition-technologies/121022facialtechrpt.pdf> (last visited Feb. 18, 2020).

“collect, capture, purchase, receive through trade, or otherwise obtain a person’s or a customer’s biometric identifiers⁶ or biometric information, unless it first:

- (1) informs the subject . . . in writing that a biometric identifier or biometric information is being collected or stored;
- (2) informs the subject . . . in writing of the specific purpose and length of term for which a biometric identifier or biometric information is being collected, stored, and used; and
- (3) receives a written release executed by the subject of the biometric identifier or biometric information or the subject’s legally authorized representative.”

740 ILCS 14/15 (b).

16. Section 15(a) of the BIPA also provides:

A private entity in possession of biometric identifiers or biometric information must develop a written policy, made available to the public, establishing a retention schedule and guidelines for permanently destroying biometric identifiers and biometric information when the initial purpose for collecting or obtaining such identifiers or information has been satisfied or within 3 years of the individual’s last interaction with the private entity, whichever occurs first.

740 ILCS 14/15(a).

17. As alleged below, Google’s practices of collecting, storing, and using biometric identifiers and information from school children in Illinois without the requisite informed written consent violate all three prongs of § 15(b) of the BIPA. Google’s failure to provide and comply with a publicly available written policy regarding its schedule and guidelines for the retention and permanent destruction of these childrens’s biometrics also violates § 15(a) of the BIPA.

⁶ BIPA’s definition of “biometric identifier” expressly includes information collected about the geometry of the face (i.e., facial data obtained through facial recognition technology). *See* 740 ILCS 14/10.

III. Google Violates the Illinois BIPA

18. In 2011, Google's then-CEO Eric Schmidt discussed the company's past development of facial recognition technology, and explained that he had put the brakes on the program due to the profound implications he believed the technology would have on individuals' privacy rights. Characterizing facial recognition technology as "crossing the creepy line," Mr. Schmidt said at the time "that [Google] would not build a database capable of recognizing individual faces even though it is increasingly possible." Matt Warman, *Google Warns Against Facial Recognition Database*, THE TELEGRAPH, May 18, 2011, available at <http://www.telegraph.co.uk/technology/google/8522574/Google-warns-against-facial-recognition-technology.html>. Nonetheless, Mr. Schmidt predicted that "some company by the way is going to cross that line." *Id.*

19. In 2013, Mr. Schmidt wrote a piece for The Wall Street Journal, titled "The Dark Side of the Digital Revolution," in which he again cautioned against the collection of Americans' biometric data and advocated in favor of regulating the collection and use of such data in this country, writing in pertinent part:

Today's facial-recognition systems use a camera to zoom in on an individual's eyes, mouth and nose, and extract a "feature vector," a set of numbers that describes key aspects of the image, such as the precise distance between the eyes. (Remember, in the end, digital images are just numbers.) Those numbers can be fed back into a large database of faces in search of a match. The accuracy of this software is limited today (by, among other things, pictures shot in profile), but the progress in this field is remarkable. A team at Carnegie Mellon demonstrated in a 2011 study that the combination of "off-the-shelf" facial recognition software and publicly available online data (such as social network profiles) can match a large number of faces very quickly. With cloud computing, it takes just seconds to compare millions of faces. The accuracy improves with people who have many pictures of themselves available online—which, in the age of Facebook, is practically everyone.

By indexing our biometric signatures, some governments will try to track our every move and word, both physically and digitally. That's why we need to fight hard not just for our own privacy and security, but also for those who are not equipped to do so themselves. We can regulate biometric data at home in democratic countries, which helps.

Eric Schmidt, *The Dark Side of the Digital Revolution*, THE WALL STREET JOURNAL, Apr. 19, 2013, available at <https://www.wsj.com/articles/SB10001424127887324030704578424650479285218>.

20. Ironically, the company that Google's CEO predicted in 2011 would one day "cross that line" by diving into the consumer biometrics-collection business turned out to be none other than Google itself.

21. In May 2015, Google announced the release of its web- and mobile app-based photo sharing and storage service called Google Photos. Users of Google Photos immediately began uploading millions of photos per day through the service, and Google in turn began using its "FaceNet"-powered facial recognition technology to extract, collect, store, and catalog the biometric data of everyone whose faces appeared in all of those uploaded photographs, in real time.⁷ Google has sold licenses to its Google Photos APIs, including APIs that enable the use of its facial recognition technology, to various mobile application developers, and derives substantial commercial profit from such sales. Thus, less than four years after warning of the immense dangers posed by facial recognition technology, Google began using that very technology to collect the immutable biometric data of hundreds of millions of its users worldwide.

⁷ A research paper released by Google engineers at around the same time as the release of Google Photos describes FaceNet as "a unified system for face verification (is this the same person), recognition (who is this person) and clustering (find common people among these faces)." Schroff, Florian, et al., "FaceNet: A Unified Embedding for Face Recognition and Clustering," June 7, 2015, available at <https://ieeexplore.ieee.org/document/7298682>.

22. But Google’s pursuit of the world’s biometric data didn’t end there. Most recently, Google has unleashed its immensely powerful biometrics-collection technology on primary and secondary school children throughout the country, including across the state of Illinois.

23. Specifically, Google provides its “ChromeBook” laptops to grade schools, elementary schools, and high schools nationwide, who in turn make these computing devices available for use by children who attend their schools. The ChromeBooks that Google provides to schools come equipped with Google’s “G Suite for Education” platform, a cloud-based service used by young students all across the country, including the state of Illinois.

24. To drive adoption in more schools – and to alleviate legitimate concerns about its history of privacy abuses – Google publicly assured parents, students, and educators alike that the company takes student privacy seriously and that it only collects education-related data from students using its “G Suite for Education” platform. Google also publicly promised never to mine student data for its own commercial purposes. In particular, Google has stated that it recognizes that “trust is earned through protecting teacher and student privacy” and has made a number of public promises designed to convince parents, teachers, school districts, and students that it will protect the privacy of students who use the “G Suite for Education” platform.⁸

25. To reaffirm the commitments it has made over the years to safeguard and protect student privacy, including to school districts, Google signed the K-12 School Service Provider Pledge to Safeguard Student Privacy (the “Student Privacy Pledge”) in or around January 2015. The Student Privacy Pledge is a set of principles and promises developed by the Future of

⁸ Privacy and Security, Google LLC, http://services.google.com/th/files/misc/gsuite_for_education_privacy_security.pdf (last visited March 26, 2020).

Privacy Forum and The Software & Information Industry Association regarding the collection, use, and maintenance of student data.⁹ Though not an original signatory, and hesitant to sign on (only succumbing after public outrage), Googled eventually signed the Student Privacy Pledge¹⁰ and affirmatively and expressly committed to:

- a. Not collect, maintain, use or share student personal information beyond that needed for authorized educational/school purposes, or as authorized by the parent/student;
- b. Not use or disclose student information collected through an educational/school service (whether personal information or otherwise) for behavioral targeting of advertisements to students;
- c. Not build a personal profile of a student other than for supporting authorized educational/school purposes or as authorized by the parent/student;
- d. Not knowingly retain student personal information beyond the time period required to support the authorized educational/school purposes, or as authorized by the parent/student;
- e. Collect, use, share, and retain student personal information only for purposes for which Google was authorized by the educational institution/agency, teacher, or the parent/student; and
- f. Disclose clearly in contracts or privacy policies, including in a manner easy for parents to understand, what types of student personal information

⁹ Student Privacy Pledge Signatories, Future of Privacy Forum and The Software & Information Industry Association, <https://studentprivacypledge.org/signatories/> (last visited March 26, 2020).

¹⁰ Google Changes Course, Signs Student Data Privacy Pledge, Wall Street Journal, <https://blogs.wsj.com/digits/2015/01/20/google-changes-course-signs-student-data-privacypledge/> (last visited March 26, 2020).

Google collects, if any, and the purposes for which the information Google maintains is used or shared with third parties.

26. Although Google publicly promoted its decision to sign the Student Privacy Pledge, and received positive coverage in the press for having done so, Google quickly began breaking the commitments it had made in the Pledge.

27. Specifically, since signing the Student Privacy Pledge, Google has implemented features on its “G Suite for Education” platform that instruct children to speak into the recording device on the ChromeBook laptops utilized at their schools (whereupon Google records the acoustic details and characteristics of their voices), and to look into the ChromeBook’s camera as well (whereupon Google scans and images the geometry of their faces, including the contours of their faces and the distances between certain localized facial points, such as the distances between the eyes and noses and ears).

28. After Google has obtained the voice of a child using its “G Suite for Education” platform on one of its “ChromeBook” laptops, Google extracts, collects, stores, and catalogs the child’s “voiceprint”—a unique, immutable, and highly sensitive biometric identifier used to identify a person—in its vast database of personally identifying biometric data. Likewise, after Google has scanned and imaged the face of a child using its “G Suite for Education” platform on one of its “ChromeBook” laptops, Google extracts, collects, stores, and catalogs the child’s “scan of face geometry” (also known as a “face template”)—another unique, immutable, and highly sensitive biometric identifier used to identify a person—in its vast database of personally identifying biometric data. Accordingly, Google collects the “biometric identifiers” of children whose voices are recorded and whose faces are scanned while using its “G Suite for Education”

platform in schools in Illinois and across the country, including of Plaintiffs and numerous other children under the age of 13. *See* 740 ILCS 14/10.

29. Google uses the voiceprints and face templates it collects to, *inter alia*, identify and track the children who use its ChromeBook laptops and the “G Suite for Education” platform that comes installed on them. This technology works by comparing the voiceprints and face templates of children whose voices are recorded and faces are scanned while using a ChromeBook with the voiceprints and facial templates already saved in Google’s vast biometrics database. Specifically, when a child’s face is scanned or voice is recorded using the “G Suite for Education” platform on a ChromeBook laptop, Google’s sophisticated voice and facial recognition technology creates a voiceprint for the child’s voice or a or a face template for the child’s face, and then compares the generated voiceprint or face template against the voiceprints and face templates already stored in its database. If there is a match, then Google is able to confirm the identity of the child using its platform, enhancing the functionality of the various features available on the platform and enabling Google to further improve the quality of the child’s voiceprint or face template stored in its database.

30. The unique voiceprints and face templates that Google has collected from children in Illinois and across the country are not only used by Google to identify children by name, they are also used by Google to recognize childrens’ gender, age, and location. Accordingly, Google collects the “biometric information” of children whose voices are recorded and whose faces are scanned while using its “G Suite for Education” platform in schools in Illinois and across the country. *See* 740 ILCS 14/10.

31. In direct violation of §§ 15(b)(2) and 15(b)(3) of the BIPA, Google never informed the parents of the children in Illinois (or elsewhere in the country) whose voiceprints

and face templates it has collected of the specific purpose and length of term for which their children's biometric identifiers and information would be collected, stored, and used, nor did Google obtain a written release from the parents of any of these children.

32. In direct violation of § 15(a) of the BIPA, Google does not have written, publicly available policies identifying their retention schedules, or guidelines for permanently destroying the biometric identifiers and biometric information of these children.

33. Thus, BIPA clearly prohibits what Google has done, Google has known so since at least 2015, and yet Google has made no effort to come into compliance with BIPA at any point during that five-year period (be it by obtaining the requisite signed written releases authorizing these practices or by turning the technology off in Illinois' schools altogether).

IV. Plaintiffs' Experiences

34. Google provides "ChromeBook" laptops to grade schools, elementary schools, and high schools nationwide, who in turn make these computing devices available for use by children who attend their schools. These Google-manufactured and provided laptops come equipped with Google's "G Suite for Education" platform, which requires the children using it to speak into a microphone on the laptop that records their voices and to look into a camera on the laptop that scans their faces.

35. At all times during the time period relevant to this action, Plaintiffs have resided in Illinois and attended a primary school in Illinois, where they were provided access to Google-supplied "ChromeBook" laptops, pre-installed with Google's "G Suite for Education" platform by school officials. Using accounts linked to their names and other personal details that Google had established for them on its ChromeBook laptops and "G Suite for Education" platform, Plaintiffs frequently have logged into their accounts and used the "G Suite for Education"

platform on these ChromeBook laptops while attending school, including features of the platform that required Plaintiffs to speak into the laptop's audio recording device and look into the laptop's camera, at which point Google recorded Plaintiffs' voices and imaged their faces.

36. After Google obtained recordings of Plaintiffs' voices while they used the "G Suite for Education" platform on "ChromeBook" laptops, Google extracted, collected, stored, and cataloged each of their "voiceprints"—a unique, immutable, and highly sensitive biometric identifier used to identify them—in its vast database of personally identifying biometric data. Likewise, after Google scanned and imaged Plaintiffs' faces while they used the "G Suite for Education" platform on "ChromeBook" laptops, Google extracted, collected, stored, and cataloged their "scans of face geometry" (i.e., "face templates")—another unique, immutable, and highly sensitive biometric identifier used to identify them—in its vast database of personally identifying biometric data. Accordingly, unbeknownst to Plaintiffs or their father, Clinton Farwell, Google collected Plaintiffs' "biometric identifiers" as they used the company's "G Suite for Education" platform at their school in Illinois. *See* 740 ILCS 14/10.

37. Google uses the voiceprints and face templates that it extracted from Plaintiffs' voices and faces to, *inter alia*, identify them while using its ChromeBook laptops and "G Suite for Education" platform. Specifically, each time either of the Plaintiffs' faces is imaged or voices is recorded while they are using the "G Suite for Education" platform on a ChromeBook laptop at school, Google's sophisticated voice or facial recognition technology creates a voiceprint of the Plaintiff's voice or a or a face template of the Plaintiff's face, and then compares the newly generated voiceprint or face template against the collection of voiceprints or face templates already stored in its database, whereupon Google is able to match the newly collected voiceprint or face template with the voiceprints or face templates previously collected

from the Plaintiff that are stored in its database and linked to the Plaintiff's identity. If there is a match, Google is able to confirm the identity of the child using its platform, and also uses the information derived from the match to improve the quality and detail of the child's voiceprint or face template saved in its database and thus better train the functionality of the various features available on its platform—enhancing the formidability of its brand in the process.

38. The unique voiceprints and face templates Google extracted from Plaintiffs' voices and faces were not only collected and used by Google to identify Plaintiffs by name, they have also been used by Google to recognize Plaintiffs' gender, age, and location. Accordingly, unbeknownst to Plaintiffs or their father, Clinton Farwell, Google collected Plaintiffs' "biometric information" as they used the company's "G Suite for Education" platform at their school in Illinois. *See* 740 ILCS 14/10.

39. In direct violation of §§ 15(b)(2) and 15(b)(3) of BIPA, Google never informed the parents of the children in Illinois (or elsewhere in the country) whose voiceprints and face templates it collected of the specific purpose and length of term for which their children's biometric identifiers and information would be collected, stored, and used, nor did Google obtain a written release from the parents of any of these children.

40. In direct violation of § 15(a) of BIPA, Google does not have written, publicly available policies identifying their retention schedules, or guidelines for permanently destroying the biometric identifiers and biometric information of these school children.

41. Neither Clinton Farwell (Plaintiffs' father, legal guardian, and authorized representative) nor any other Class member's parent, legal guardian, or authorized representative received a disclosure from Google that it would collect, capture, otherwise obtain, or store unique biometric identifiers or biometric information extracted from their child's face or voice,

and neither Clinton Farwell nor any other Class member's parent, legal guardian, or authorized representative ever consented, agreed or gave permission—via a written release or otherwise—to authorize or permit Google to collect, capture, otherwise obtain, or store their child's sensitive biometric data or in this way.

42. Likewise, Google never provided Clinton Farwell (Plaintiffs' father, legal guardian, and authorized representative) or any other parent, legal guardian, or authorized representative of any member of the Class with an opportunity to prohibit or prevent the collection, storage, or use of their child's unique biometric identifiers, biometric information, or other personally identifying information.

43. Nevertheless, when Plaintiffs and the unnamed members of the Class spoke to or had their faces imaged in connection with their use of Google's "G Suite for Education" platform in Illinois, Google's sophisticated face and voice recognition technologies scanned the recordings of their voices and the geometry of their faces that it had collected, and created unique "voiceprints" and "face templates" corresponding to Plaintiffs and each member of the proposed Class, all in direct violation of BIPA.

CLASS ALLEGATIONS

44. **Class Definition:** Plaintiffs, by and through their father and legal guardian, bring this action pursuant to 735 ILCS 5/2-801 on behalf of a class of similarly situated individuals defined as follows (the "Class"):

All persons who, while using the "G Suite for Education" platform at a primary or secondary school in Illinois, had their voiceprint or face template collected by Google after March 26, 2015.

The following are excluded from the Class: (1) any Judge presiding over this action and members of his or her family; (2) Defendant, Defendant's subsidiaries, parents, successors,

predecessors, and any entity in which Defendant or its parent has a controlling interest (including current and former employees, officers, or directors); (3) persons who properly execute and file a timely request for exclusion from the Class; (4) persons whose claims in this matter have been finally adjudicated on the merits or otherwise released; (5) Plaintiff's counsel and Defendant's counsel; and (6) the legal representatives, successors, and assigns of any such excluded persons.

45. **Numerosity:** Pursuant to 735 ILCS 5/2-801(1), the number of persons within the Class is substantial, believed to amount to at least tens of thousands of children for the Class. It is, therefore, impractical to join all members of the Class as named plaintiffs. Further, the size and relatively modest value of the claims of the individual members of the Class renders joinder impractical. Accordingly, utilization of the class action mechanism is the most economically feasible means of determining and adjudicating the merits of this litigation.

46. **Commonality and Predominance:** Pursuant to 735 ILCS 5/2-801(2), there are well-defined common questions of fact and law that exist as to all members of the Class and that predominate over any questions affecting only individual members of the Class. These common legal and factual questions, which do not vary from member to member, and which may be determined without reference to the individual circumstances of any individual member, include but are not limited to the following:

- a. whether Google collected, captured, or otherwise obtained Plaintiffs' and other Illinois school children's "biometric identifiers" or "biometric information" in connection with their use of the "G Suite for Education" platform at primary and secondary schools in Illinois during the preceding five years;

- b. whether Google stored Plaintiffs' and the Class's "biometric identifiers" or "biometric information";
- c. whether Google informed Plaintiffs and the Class that it would collect, capture, otherwise obtain and then store their "biometric identifiers" or "biometric information";
- d. whether Google obtained a written release (as defined in 740 ILCS 14/10) prior to collecting, capturing, or otherwise obtaining, and then storing, Plaintiffs' and the Class's "biometric identifiers" or "biometric information";
- e. whether Google developed a written policy, made available to the public, establishing a retention schedule and guidelines for permanently destroying "biometric identifiers" and "biometric information" when the initial purpose for collecting, capturing, or otherwise obtaining these "biometric identifiers" and "biometric information" has been satisfied or within 3 years of their last interaction with Plaintiffs and members of the Class, whichever occurs first;
- f. whether Google complied with any such policy;
- g. whether Google used Plaintiffs' and the Class's "biometric information" to identify them;
- h. whether Google's violations of the BIPA were committed negligently; and
- i. whether Google's violations of the BIPA were committed intentionally or recklessly.

47. **Adequate Representation:** Pursuant to 735 ILCS 5/2-801(3), Plaintiffs have retained and are represented by qualified and competent counsel who are highly experienced in complex consumer class action litigation. Plaintiffs and their counsel are committed to vigorously prosecuting this class action. Neither of the Plaintiffs, nor any of their counsel, have any interest adverse to, or in conflict with, the interests of the absent members of the Class. Plaintiffs are able to fairly and adequately represent and protect the interests of the Class. Plaintiffs have raised viable statutory claims of the type reasonably expected to be raised by members of the Class, and will vigorously pursue those claims. If necessary, Plaintiffs may seek leave of this Court to amend this Complaint to include additional representatives to represent the Class or to add additional claims or classes as may be appropriate.

48. **Superiority:** Pursuant to 735 ILCS 5/2-801(4), a class action is superior to other available methods for the fair and efficient adjudication of this controversy because individual litigation of the claims of all members of the Class is impracticable. Even if every member of the Class could afford to pursue individual litigation, the Court system could not. It would be unduly burdensome to the courts in which individual litigation of numerous cases would proceed. Individualized litigation would also present the potential for varying, inconsistent or contradictory judgments, and would magnify the delay and expense to all parties and to the court system resulting from multiple trials of the same factual issues. By contrast, the maintenance of this action as a class action, with respect to some or all of the issues presented herein, presents few management difficulties, conserves the resources of the parties and of the court system and protects the rights of each member of the Class. Plaintiffs anticipate no difficulty in the management of this action as a class action. Class-wide relief is essential to compel compliance with BIPA.

CAUSE OF ACTION
Violation of 740 ILCS 14/1, *et seq.*
(On Behalf of Plaintiffs and the Class)

49. Plaintiffs incorporate the foregoing allegations as if fully set forth herein.

50. BIPA makes it unlawful for any private entity to, among other things, “collect, capture, purchase, receive through trade, or otherwise obtain a person’s or a customer’s biometric identifiers or biometric information, unless it first: (1) informs the subject . . . in writing that a biometric identifier or biometric information is being collected or stored; (2) informs the subject . . . in writing of the specific purpose and length of term for which a biometric identifier or biometric information is being collected, stored, and used; and (3) receives a written release executed by the subject of the biometric identifier or biometric information or the subject’s legally authorized representative.” 740 ILCS 14/15(b).

51. Plaintiffs’ father and legal guardian, Clinton Farwell, is Plaintiffs’ “legally authorized representative” within the meaning of BIPA, and served in such capacity at all times relevant to this action. See 740 ILCS 14/15 (b).

52. Google is a corporation and thus qualifies as a “private entity” under the BIPA. See 740 ILCS 14/10.

53. Plaintiffs and the Class members are minor children who had their “biometric identifiers,” including their voiceprints and scans of face geometry, collected, captured, received, or otherwise obtained by Google in connection with their use of Google’s “G Suite for Education” platform at a primary school in Illinois after March 26, 2015. See 740 ILCS 14/10.

54. Plaintiffs and all members of the Class are minor children who had their “biometric information” collected by Google (in the form of their gender, age, and location) through Google’s collection and use of personally identifying information derived from their “biometric identifiers” that Google has used to identify them.

55. Google systematically collected, captured, or otherwise obtained Plaintiffs' and the Class members' "biometric identifiers" and "biometric information" without first obtaining signed written releases, as required by 740 ILCS 14/15(b)(3), from any of them or their "legally authorized representatives," i.e., their parents or legal guardians.

56. In fact, Google failed to properly inform Plaintiffs or members of the Class, or any of the foregoing's parents, legal guardians, or other "legally authorized representatives," in writing that Plaintiffs' or the Class members' "biometric identifiers" and "biometric information" were being "collected or stored" by Google, nor did Google inform Plaintiffs or members of the Class, or any of the foregoing's parents, legal guardians, or other "legally authorized representatives," in writing of the specific purpose and length of term for which Plaintiffs' or the Class members' "biometric identifiers" and "biometric information" were being "collected, stored and used" as required by 740 ILCS 14/15(b)(1)-(2).

57. In addition, Google does not publicly provide a retention schedule or guidelines for permanently destroying the "biometric identifiers" and "biometric information" of Plaintiffs or the Class members, as required by the BIPA, or otherwise indicate that it permanently destroys biometric identifiers and biometric information when the initial purpose for collecting, capturing, or otherwise obtaining such information has been satisfied or within 3 years of its last interaction with Plaintiffs and members of the Class, whichever occurs first. See 740 ILCS 14/15(a).

58. Google has denied BIPA's promise of privacy to those who need it most. By collecting, storing, and using Plaintiffs' and the other Class members' "biometric identifiers" and "biometric information" as described herein, Google recklessly or intentionally violated each of

BIPA's requirements, and infringed Plaintiffs' and the other Class members' rights to keep their sensitive, immutable, and uniquely identifying biometric data private.

59. On behalf of themselves and the proposed Class members, by and through their father and natural legal guardian, Clinton Farwell, Plaintiffs seek: (1) injunctive and equitable relief as is necessary to protect the interests of Plaintiffs and the other members of the Class by requiring Google to comply with the BIPA's requirements for the collection, capture, and storage of "biometric identifiers" and "biometric information" as described herein, including to permanently destroy the biometric data it has collected from minor children in Illinois to date and to refrain from collecting such data in the future absent the requisite prior informed written authorization of their legally authorized representatives; (2) statutory damages of \$1,000.00 to Plaintiff H.K., Plaintiff J.C., and each Class member pursuant to 740 ILCS 14/20 for each negligent violation of BIPA committed by Google; (3) statutory damages of \$5,000.00 to Plaintiff H.K., Plaintiff J.C., and each Class member pursuant to 740 ILCS 14/20 for each intentional or reckless violation of BIPA committed by Google; and (4) reasonable attorneys' fees and costs and other litigation expenses to Plaintiffs' counsel and proposed Class counsel pursuant to 740 ILCS 14/20(3).

PRAYER FOR RELIEF

WHEREFORE, on behalf of themselves and all others similarly situated, Plaintiffs H.K. and J.C., minor children, by and through their respective father and legal guardian, Clinton Farwell, seek judgment against Defendant as follows:

- (a) Certifying this case as a class action on behalf of the Class defined above, appointing Plaintiffs, by and through their father and legally authorized guardian,

Clinton Farwell, as representatives of the Class, and appointing their counsel as Class Counsel on behalf of the Class;

- (b) Declaring that Google's actions, as set out above, violate the BIPA, 740 ILCS 14/1, *et seq.*, with respect to Plaintiffs and members of the Class;
- (c) Awarding \$1,000.00 statutory damages to Plaintiff H.K., Plaintiff J.C., and each member of the Class pursuant to 740 ILCS 14/20(1) for each violation of BIPA committed by Google negligently, or \$5,000.00 pursuant to 740 ILCS 14/20(2) for each violation of BIPA committed by Google intentionally or recklessly;
- (d) Awarding injunctive and other equitable relief pursuant to BIPA as is necessary to protect the interests of Plaintiffs and members of the Class, including, *inter alia*, an order requiring Google to collect, store, and use the biometric identifiers and biometric information of children in Illinois in compliance with BIPA, and to permanently destroy the biometric identifiers and biometric information it has collected from Plaintiffs and Class members to date;
- (e) Awarding Plaintiffs' counsel and proposed Class counsel their reasonable litigation expenses and attorneys' fees pursuant to BIPA;
- (f) Awarding Plaintiffs and the Class pre- and post-judgment interest, to the extent allowable;
- (g) Awarding Plaintiffs and the Class such other and further relief as equity and justice may require.

JURY TRIAL

Plaintiffs demand a trial by jury on all claims and issues so triable.

Dated: November 19, 2020

Respectfully submitted,

/s/ Andrew Stuckart

Plaintiffs,

v.

GOOGLE, LLC,

Defendant.

Case No. 2020-LL-00017

NOTICE AND ACKNOWLEDGMENT OF WAIVER OF SERVICE OF SUMMONS

NOTICE TO: Google, LLC

The enclosed summons and complaint are served pursuant to section 2-213 of the Code of Civil Procedure.

You must complete the acknowledgment part of this form and return one copy of the completed form to the sender within 30 days.

You must sign and date the acknowledgment. If you are served on behalf of a corporation, unincorporated association (including a partnership), or other entity, you must indicate under your signature your relationship to that entity. If you are served on behalf of another person and you are authorized to receive process, you must indicate under your signature your authority.

If you do not complete and return the form to the sender within 30 days, you (or the party on whose behalf you are being served) may be served a summons and complaint in any other manner permitted by law.

If you do complete and return this form, you (or the party on whose behalf you are being served) must answer the complaint within 60 days. If you fail to do so, judgment by default will be taken against you for the relief demanded in the complaint.

I declare, under penalty of perjury, that this notice and acknowledgment of receipt of summons and complaint will have been emailed on March 10, 2021.
